

ISDE 2016 Inspection DAY 3 & 4

Hello everybody,
Here is a brief report for Day 5 after my inspection.

After the start riders run around the circuit to arrive at the CT Circuit. After that they will take the transport to arrive in TC Berbinzana. After that they will take 7' by asphalt road until CT Larraga (Pay attention to the modification made on Wednesday 12th in the map, caused by environmental problem). After CT they need around 50' to arrive at the TC Larrion.. After the TC they will spend 28' to arrive at the CT Ancin, after the CT another 35' to arrive at ET Zuniga. Immediately after the ET they will arrive at the TC Zuniga. After TC Zuniga riders take a transport to arrive at the CT Circuit. After that they will join the Pre finish like on the previous days.

My comments about the transfers is that from the start, after the CT Circuit, riders will take the transport of Day 1 & 2 in the opposite direction, and it is almost the same until the CT at Ancin, where they will join with the course of Day 3 & 4 but in the opposite direction. Unfortunately, always for environmental problems, riders will arrive at the TC1 in Berbinzana with more minutes for the service than usual caused by a shortcut in the stage.

Good luck to everybody!

Maurizio Micheluz
FIM Track Inspector
